### Book release "UrsulaGates: Compromise by Lobbies" unprecedented revelations on SMSgate and the criminal case against Ursula von der Leyen

Official release: November 20, 2024

April 5, 2023. Lobbyist Frédéric Baldan files a criminal complaint with the Liège examining magistrate Frédéric Frenay. In an unprecedented move, the complaint was brought against the President of the European Commission, Ursula von der Leyen. The charges? Corruption, illegal taking of interest, destruction of administrative documents and usurpation of titles and functions. At issue is the secret text negotiation between the Commission President and Pfizer CEO Albert Bourla. At stake: the right to transparency and the 35.1 billion euros offered on a platter to Pfizer.

In his book, Frédéric Baldan makes exclusive revelations and exposes the secrets of the lobbying industry so that we can gain access to information and reclaim the means to regain control of our lives - not least by regaining control of public decision-making. In the words of the author himself, this book highlights elements that the Judicial Police were unable to identify on their own. In particular, it reveals the name of the major lobbying firm that "sold" the Gulf War and was commissioned by Pfizer to misrepresent the science.
