

## COMMUNIQUÉ N°3

### ORGANIZATION OF URSULA VON DER LEYEN'S IMPUNITY REFUSAL TO HEAR THE CASE ON ITS MERITS DESPITE THE FACTS

#### **"The facts are there, but the courts have declined to rule on the merits of the case"**

As a result, Ursula von der Leyen enjoys impunity. Infringements have indeed been committed, but it seems that no one can demand that they be prosecuted or punished. By refusing to deal with them, the courts are demonstrating that the European Union has become an area of unfreedom, insecurity and injustice.

#### **"Violent denial of the rule of law, democracy and fundamental rights"**

By stating that "*the violation of a right, even if it is considered fundamental, does not necessarily imply the corollary existence of damage on the part of the person who invokes it*", the Liège Indictment Division has seriously undermined the effectiveness of human rights. This decision is contrary to the jurisprudence of the European Court of Human Rights (ECHR), and is incomprehensible under the Belgian Penal Code, which punishes arbitrary infringements of rights guaranteed by the Constitution.

#### **"Belgian justice has created two classes of citizens"**

firstly, that of Mrs von der Leyen, who can commit offences without the justice system taking any steps to prosecute them, and secondly, that of other Europeans, who are reduced to the status of sub-citizens deprived of the exercise of their rights. Perhaps this is why Emily O'Reilly, the European Union's Ombudsman, having seen for herself the destruction of human rights within the institutions, described the European Commission as an organization similar to the Mafia.

#### **"This procedure has enabled us to achieve some important milestone victories"**

- 1) We have obtained an unredacted copy of the Pfizer contract, in a legal manner;
- 2) We are now in possession of the investigation report from the Belgian Federal Police;
- 3) We can now demonstrate that infringements have indeed been committed;
4. we are no longer bound by the secrecy of the investigation.

#### **"We will continue the prosecution of Mrs von der Leyen"**

We will impose the return of democracy, uphold the rule of law, restore fundamental rights, and not let corruption go unpunished.

The judgement only temporarily allows Mrs von der Leyen to escape justice, symbolically on the same day that Anthony Fauci was granted a presidential preventive pardon for his crimes.
